

Sravan Krishna C M

+91 974-500-7788 | sravan@p1ng.me | p1ng.me | linkedin.com/in/sravan-krishna | github.com/sravan1946

Cybersecurity-focused Software Developer and CTF Team Captain (India #30). Strong in Flutter, infrastructure automation, and secure open-source systems.

EDUCATION

Lovely Professional University

Bachelor of Technology in Computer Science and Engineering, Minor in Cybersecurity

Punjab, India

Aug. 2023 – Aug. 2027

Gurukulam Public School

Higher Secondary Education (XII) — Computer Science (79.2%)

Kerala, India

2021 – 2023

Gurukulam Public School

Secondary Education (X) (83.2%)

Kerala, India

2010 – 2021

TECHNICAL SKILLS

Languages: Python, C/C++, Dart (Flutter), Bash, SQL

Cybersecurity: Reverse Engineering, Web Exploitation, Burp Suite, Nmap, GDB

DevOps & Cloud: Docker, Docker Compose, Caddy (Reverse Proxy), CI/CD, Appwrite, Oracle Cloud

Tools & OS: Git, GitHub, Linux (Arch, Debian)

EXPERIENCE

Open-Source & Freelance Software Developer

Nov 2019 – Present

Self-Employed | *sravan-cogs*

- Built and maintained **Python** cogs for Red-DiscordBot; the **sravan-cogs** repository has earned **7 GitHub stars**.
- Released **10+ production-ready modules** including games, moderation utilities, and server management tools.
- Maintained **70+ public repositories**, demonstrating long-term consistency and breadth in open-source development.

CTF Team Captain

Mar 2025 – Present

Unemployed Nerds | *CTFtime.org*

- Led a competitive CTF team to a **national rank of #30 in India (2025)** on CTFtime.
- Solved and coordinated challenges across reverse engineering, cryptography, and web exploitation under time constraints.
- Directed team strategy, task distribution, and post-solve analysis to improve efficiency and consistency.

PROJECTS

Infrastructure Automation

Aug 2024 – Present

Docker, Caddy, Self-Hosted Backend (Appwrite) | *appwrite.p1ng.me*

- Self-hosted and operated an open-source backend platform on a VPS using **Docker** and **Docker Compose**.
- Handled service deployment, updates, reverse proxying, and HTTPS termination using **Caddy**.
- Integrated the backend into personal projects and set up a lightweight CI/CD workflow for automated deployments.

Personal Wiki / Knowledge Base

Jan 2025 – Present

Wiki.js, Docker, Linux, Reverse Proxy (Caddy) | *wiki.p1ng.me*

- Built and self-hosted a personal technical knowledge base using **Wiki.js** on Docker.
- Documented system setups, projects, and workflows, including a complete Linux desktop setup with **Hyprrland**.

LpuLive (Unofficial)

Sep 2025 – Present

Flutter, Dart | *GitHub*

- Developing an unofficial cross-platform client for the LPU Live platform using **Flutter**.
- Implemented core application flows, UI components, and client-side logic to interface with the existing service.
- Maintaining and iterating on the project with a focus on usability and stability.

HelloCare

Nov 2025 – Present

Flutter, Dart, Firebase | *GitHub*

- Contributed to a cross-platform healthcare mobile application built with **Flutter**.
- Implemented authentication, medical record access, and QR-based data sharing using **Firebase**.
